

## What you need to know about telemedicine

When an in-person doctor's visit isn't possible, ask your doctor if telemedicine is an option. Use your mobile device or computer to discuss treatment options for your mild-to-moderate eczema with your doctor and ask if EUCRISA is right for you, all from the comfort of your home.

### Get the most out of your virtual visit

If you do schedule a virtual visit, here are some tips to help make it go smoothly:

#### BEFORE YOUR APPOINTMENT

- Check that you have a good internet connection
- Make sure your device is fully charged
- Test your video and microphone to make sure they're working

#### LET'S GET ORGANIZED

- Contact your doctor's office ahead of time and complete any necessary paperwork
- Write down any questions you might have
- Make note of the symptoms you've experienced, and how you've been managing your eczema. If needed, gather clearly visible photos of your condition
- Locate any links or instructions from your doctor's office, so you'll be ready to connect on time
- With the rules around telemedicine changing, check with your insurance provider to see if your visit will be covered and how much your copay will be

#### LIGHTS, CAMERA, VISIT!

- Make sure you're in a well-lit room so your doctor can see you clearly during the visit
- Have a flashlight on hand so your doctor can see your eczema
- Pick a quiet space for your call and try to limit background noise and interruptions

#### INDICATION

EUCRISA is a prescription ointment used on the skin (topical) to treat mild-to-moderate eczema (atopic dermatitis) in adults and children 3 months of age and older.

#### IMPORTANT SAFETY INFORMATION

Do not use EUCRISA if you are allergic to crisaborole or any of the ingredients in EUCRISA.

**EUCRISA may cause side effects including allergic reactions** at or near the application site. These can be serious and may include hives, itching, swelling, and redness. If you have any of these symptoms, stop using EUCRISA and get medical help right away. (continued on next page)

Please see Important Safety Information on the next page and Patient Information on page 3.

**IMPORTANT SAFETY INFORMATION (continued from previous page)**

The most common side effect of EUCRISA is application site pain, such as burning or stinging.

**EUCRISA is for use on skin (topical use) only.** Do not use EUCRISA in your eyes, mouth, or vagina.

**Notes**

Please see Patient Information on page 3.

**PATIENT INFORMATION**  
**EUCRISA® (you-KRIS-a)**  
**(crisaborole) ointment, 2%**

**Important information: EUCRISA is for use on skin (topical use) only.** Do not use EUCRISA in your eyes, mouth, or vagina.

**What is EUCRISA?**

EUCRISA is a prescription medicine used on the skin (topical) to treat mild to moderate eczema (atopic dermatitis) in adults and children 3 months of age and older.

It is not known if EUCRISA is safe and effective in children under 3 months of age.

**Who should not use EUCRISA?**

Do not use EUCRISA if you are allergic to crisaborole or any of the ingredients in EUCRISA. See the end of this leaflet for a complete list of ingredients in EUCRISA.

**Before using EUCRISA, tell your healthcare provider about all of your medical conditions, including if you:**

- are pregnant or plan to become pregnant. It is not known if EUCRISA will harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if EUCRISA passes into your breast milk.

**Tell your healthcare provider about all the medicines you take,** including prescription and over-the-counter medicines, vitamins, and herbal supplements.

**How should I use EUCRISA?**

- Use EUCRISA exactly as your healthcare provider tells you to use it.
- Apply a thin layer of EUCRISA to the affected areas 2 times each day.
- Wash your hands after applying EUCRISA, unless hands are being treated. If someone else applies EUCRISA for you, they should wash their hands after applying EUCRISA.

**What are the possible side effects of EUCRISA?**

**EUCRISA may cause side effects.**

- **Allergic reactions.** EUCRISA may cause allergic reactions at or near the application site. These can be serious and may include hives, itching, swelling, and redness. If you have any of these symptoms, stop using EUCRISA and get medical help right away.

The most common side effect of EUCRISA is application site pain, such as burning or stinging.

This is not the only possible side effect of EUCRISA.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

**How should I store EUCRISA?**

- Store EUCRISA at room temperature, between 68°F and 77°F (20°C and 25°C).
- Keep the tube tightly closed.

**General information about the safe and effective use of EUCRISA**

Medicines are sometimes prescribed for purposes other than those listed in a Patient Information leaflet. Do not use EUCRISA for a condition for which it was not prescribed. Do not give EUCRISA to other people, even if they have the same symptoms that you have. It may harm them. You can ask your pharmacist or healthcare provider for information about EUCRISA that is written for healthcare professionals.

**What are the ingredients in EUCRISA?**

**Active ingredient:** crisaborole

**Inactive ingredients:** white petrolatum, propylene glycol, mono- and di-glycerides, paraffin, butylated hydroxytoluene, and edetate calcium disodium.
